## 2010 FAR/AIMs now available 24 hours/Day

Leaving late or leaving early and need a local chart, approach procedures or AFD? No longer do you have to plan your departure with the Pilot Shop hours. Now you can get the most popular charts 24 hours a day from NNA's new vending machine, located in the lobby of the FBO. Prices vary from \$7 to \$12 and exact change is preferred. If you need change, Atlantic Aviation will keep change at the counter for your convenience after hours.

You may have heard that NACO has reduced the number of chart agents beginning in September. While that is true, NNA will continue to serve the Northern Nevada Aviation community.

## 50% off Inventory Reduction Sale Saturday November 7 from 9am – 12PM

Northern Nevada Aviation's Pilot Shop needs to shed its old inventory and you can be the benefactor. All inventory in the Pilot Shop will be sold at 50% off... (Cessna Pilot Private and Instrument Student kits not included)

Airport Guides, Kneeboards, plotters, E6B flight computer, logbooks, aviation books, airband scanner, PTS, oral exam guides, King School's Multi-Engine and Commercial student courses will all be sold.

## Thinking of an Instrument Rating? Try an IFR Discovery Flight

With Winter approaching, you may find your some of your favorite VFR destinations off limits due to a thin overcast layer hovering a few hundred feet overhead, especially along the coast. Don't let that spoil your weekend, get your instrument rating! Ask any NNA CFII to take you up for a IFR Discovery Flight and demonstrate an IFR departure and landing. It's fun and you will get a taste of how much more useful your pilots license can be when you are not dependant on a VFR ceiling for your next trip. An IFR Discovery Flight is only \$140 and will count towards your IFR Rating.

## Air Taxi/Charter Service now available from NNA

Need to get somewhere in the western states fast and on your schedule? Let pilot Bill Bradford, a former airline captain with over 14,000 hours of experience, get you there fast and safe in a modern Turbo Charged Cessna 182, complete with the latest G1000 avionics and XM radio for your inflight enjoyment.

Up to 3 passengers can fly in comfort to their destination at over 175 MPH. Elko, Winnemucca, Palo Alto, Napa, Monterey, Las Vegas, San Jose or anywhere you want to go is now within reach.

No need to hurry the meeting to make your flight, we wait for you!

*Make that meeting and be home for dinner!*

Contact Bill Bradford at 775-225-9856 or [bill@nnaviation.com](mailto:bill@nnaviation.com) for a quote or to schedule a trip.

## Student Accomplishments

Chris Fejes  
Private Pilot
